Certified Veteran Owned Small Business

### Mission Statement

Cloud Staffing Professionals is veteran owned company founded by two industry experts with over 30 years of combined experience. We specialize in placing high end professionals with clients that demand the type of quality and critical needs for their projects. What sets Cloud Staffing apart from other agencies is the type of process that is in place to ensure that you are getting only the best quality out of your consultants.

### Snapshot

Cloud Staffing has a database of over 10,000 contractors and or consultants, most of whom are referred by consultants who have had positive experiences working with CSP. Viable consultants are then vetted by expert recruiters to make sure that by the time that you see the resume that your job is their number one priority and that they have recent client manager references checked and everything came back great! Quality is what we demand at CSP because that's what you as the client deserve.
